

90cm Gas Convection Oven, Gas Grill Professional Series

F905PROGKX

This Bertazzoni Professional Series 90cm built-in gas oven with gas grill offers a best-in-class cavity capacity of 88 litres. With 5 functions it is ideal for fish and roasting meat as gas ovens reach a high temperature quickly, which helps to seal the food, making it crispy on the outside while retaining moisture inside. Temperature adjustments are instantaneous, which makes it a very precise way to cook. The non-convection mode is excellent for baking cakes, while the fan-assisted mode ensures an even heat distribution for single and multi-level roasting and baking without flavour crossover. The oven is easily controlled by metal knobs with soft opening door with metal handle for ease of use. The door is double-glazed for safety and efficiency. Available in Stainless Steel and Carbonio.
